MOLD PROBLEMS Solved!

Are MOLD RISKS Entering Into Your Multi-Family Project Equation?

Your Solution to the Problem, FortiCel™!

FortiCel™ Facts

FORTiCEL™ 25 YEAR WARRANTY Mold Prevention

Permanently Protect Structural Surfaces Against Mold Growth

For just pennies per foot your structure can include FortiCel's™ protective barrier and prevent mold growth on its coating surface.

The permanent protection benefits of FortiCel's™ protective barrier will provide unparalleled microbial growth inhibition on all treated construction surfaces thereby reducing the potential of mold growth.

Commercial and residential contractors know the benefits of FortiCel™ as an effective and valuable solution to provide long-lasting value that is warranted for a full 25 years.

Join the many industry leading multifamily builders in your area already protecting their projects with FortiCel.

- ★ Increased Liability Protection For Contractors, Architects & Owners
- ★ Significant Maintenance Cost Reduction During Operating Years
- ★ Provide Peace Of Mind To Your Tenants & Owners
- ★ Increase Valuation To REITS & Other Investors
- ★ Eliminate Mold Remediations & Associated Construction Delays
- ★ Eliminate Costly Mold Certification & Inspection Budgets

FortiCel™ is a proprietary thin film paint coating which incorporates a registered mildewcide that inhibits the growth of molds and mildew on the coating. When FortiCel™ is properly applied*, the dried film coating minimizes the growth of mold on the coating itself.

FortiCel™'s protective barrier will provide unparalleled microbial growth inhibition on the paint film applied to construction surfaces. This dried film will not wash off, or degrade over time, ensuring long term benefit of the film integrity.

This means that the benefits of the FortiCel™ coating will remain intact even in the most challenging environments. We are so confident in the ability of FortiCel™ and its benefits that we will warranty the coating for a full 25 years against degradation due to normal wear and weathering, and mold growth on the coating of the FortiCel™ film surface.

Call today to speak with professionals that have the knowledge and product line to solve your moisture management equation.
